---

Hi Gary,

Please see the attached email and tables that I had one of my staff review. The TCEQ revised their TRRP Tables in September 2014. I'm thinking that is why there were so many of them that are off. BTW, I did a double check and found one mistake – the TCEQ TRRP PCL for aluminum in residential soil is 64,000 mg/kg (not 65,000).

Terry

**Subject:** CES Chemical Spill Response Data (DRAFT)

**Terry:**

**Please look at this data and let me know if I have the appropriate STATE comparison data for each of the media sampled. This is what will go in the EPA report for the Chemical Spill Response. I am also checking with our office to see that I am doing an appropriate comparison. If you could do the review quickly as I would like to get this wrapped up.**

**Thanks**

**Gary Moore**
